September 2026

Dear Parent

Year 10 is a crucial period in the educational lives of our students. As a school, we are fully committed to supporting your child in achieving their full potential. We want all of our students to start their lives equipped not only with excellent GCSE grades but also with the resilience, skills, and attributes they will need to confidently navigate life beyond school.

To ensure every student has the best possible chance of success in their GCSE examinations at the end of Year 11, we provide a vast range of support, guidance, and resources throughout the academic year. A cornerstone of this support is our comprehensive programme of after-school revision classes.

For Year 10 students this year, sessions will run weekly, for approximately 30 minutes in core subjects – English, Science and maths.

Form tutor time will be used in the majority of cases for a student to work on either Geography, History or an option-based subject they are taking. In the few cases where this is not possible, revision guides will be provided for these students to work independently on core subjects during form tutor time. We will review the groups a student is in as we progress through the year. As a result of form tutor time being used as an intervention tool, it is imperative that your child attends form tutor time on time to ensure maximum impact.

### The Impact of Attendance

Consistent attendance at these revision sessions is one of the most decisive factors in final exam performance. These intensive, focused sessions allow teachers to address individual knowledge gaps, refine vital exam techniques, complete important coursework tasks and build student confidence. Missing these opportunities can heavily impact a student's final outcomes, whereas full attendance frequently provides the crucial extra marks needed to cross higher grade boundaries.

With this in mind, please find enclosed a revision timetable for your child, which details the specific subjects they should attend on each given day. These sessions will be with their subject teacher in the majority of cases. Science will be the exception due to staff teaching multiple groups. Students will be informed which member of staff will be running the session. Every after-school revision session attended by your child will see them entered into a draw to win a voucher. This will take place every two weeks.

The coming year is critical in ensuring that your child leaves with the best possible set of qualifications. Year 10 will form the foundations for Year 11. It is imperative that along with the interventions we have put in place for Year 10 that your child completes all homework which is set and starts to revise independently outside of school and re-visiting prior work that has been taught. If your child does this I have absolutely no doubt that your child will achieve excellent outcomes if they work hard, attends these sessions consistently, and never gives less than their best over the next six months.

If you have any questions or concerns, please do not hesitate to contact me.

Yours faithfully

Mr M Newsome
